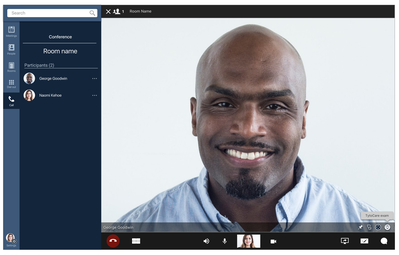
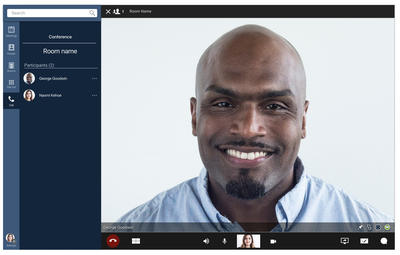
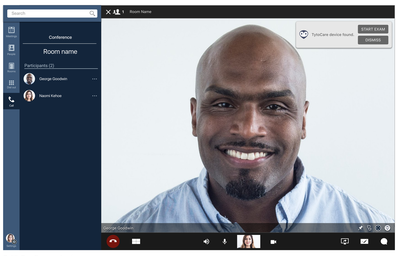
UX-295 Tytocare Integration RC In-call



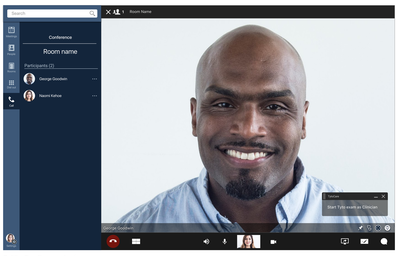
D-01a. TytoCare icon.
TytoCare button would show if remote user has a paired TytoCare device.



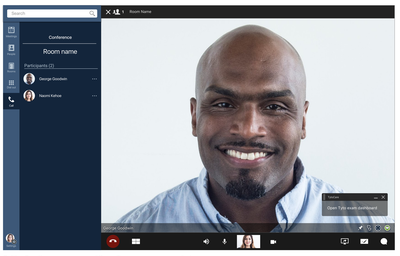
D-01b. TytoCare icon. In session.



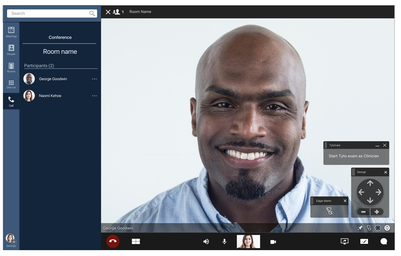
D-02. TytoCare device found.
'Start Exam' button opens the Tyto control panel. User has to click on 'Start Tyto exam as Clinician' in order to start it. Notification appears when a POC user (user with paired TytoCare device) is found in the call.



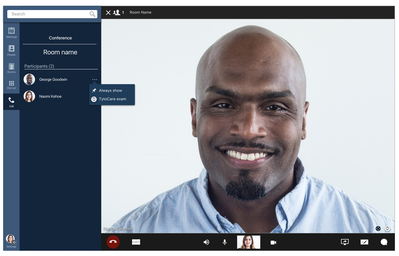
D-03a. TytoCare device found.
Whichever user clicks here to 'Start Tyto exam as Clinician' is designated as the Clinician user. After Tyto exam starts (in session), only the Clinician user has the 2 options to 'Open Tyto exam dashboard' and 'End Tyto exam'. Any other user is designated as a Reviewer user and only has the option to 'Open Tyto exam dashboard' (view-only).



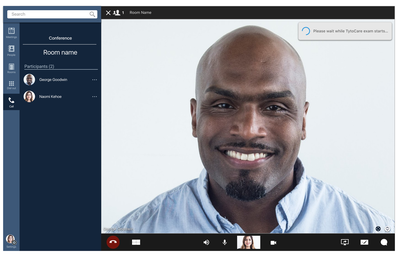
D-03b. TytoCare exam started. "Open Tyto exam dashboard" dialog.
This screen is for any RC user who joins after a Tyto exam has already been started.



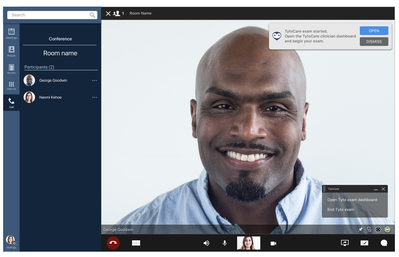
D-03c. Tytocare and FECC panel are opened.



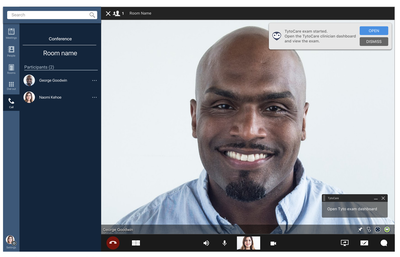
D-04. Sidebar menu. TytoCare exam item.



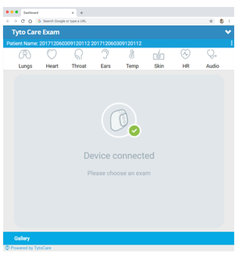
D-05. TytoCare exam starts.



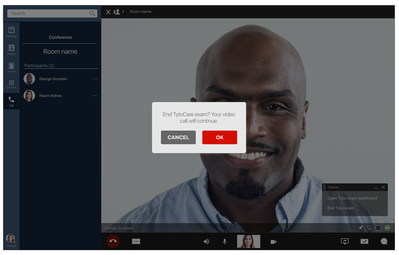
D-06. TytoCare exam started. Clinician view.
Clicking on 'OPEN' button will open the clinician dashboard in a separate Chrome browser window. User can DISMISS the notification. At any time after Tyto exam is started, user can click the green Tyto icon and click 'Open Tyto exam dashboard' to open the dashboard again - relevant for disconnection scenarios.



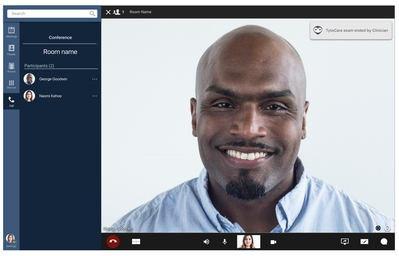
D-07. TytoCare exam started. Reviewer view.
View-only clinician dashboard is for the Reviewer specifically



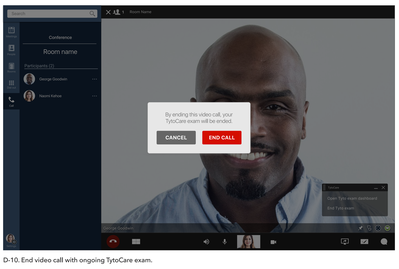
Clinician dashboard in browser
Clinician dashboard opened in a browser will show the side-by-side view of Vidyo and dashboard for RC users.



D-08. End TytoCare exam confirmation dialog.



D-09. TytoCare exam ended.



D-10. End video call with ongoing TytoCare exam.
